Pre-production for Game Smarter

Game Smarter is website designed to take game data and provide you with information to improve your performance.

Game Smarter is an easy-to-use 3rd party website that provides you all the information you need to get the competitive edge on your opponents. Our goals are to curate the most amount of community known information on a wide range of games to make users gaming experience better. We hope to expand our pool of games as the time goes on to become the number 1 third party gaming application.

Personas
- Competitive Gamer
    - Competitive gamers are always looking for the edge in their games and would love our Website
- Game Developer
    - Could use our website to look into what is strong vs weak in there games and potentially balance it.
- New Gamers
    - For people that just got a new game and want to learn how to play will find a quick and easy website to do just that

    COMPS

- Blitz
- Face Check
- Overwolf

    All three of these platforms are off similar attributes but they are more baselined for one game or a company's set of games then all popular games.

    Overflow(To simplify the project I will only be creating one game guide)

Basic Home page with mission statement for website along as a list of games with data on them/Pick the game you want to receive information/ data on
Shifted to game screen that displays a basic description of the game and shows key elements of gameplay features. / chose between information provided to see what you can learn
If game contains characters a character selection option will be available at the bottom of the game screen / the user will be able to pick what character they want to look at
